

# Process More Cases, Serve More Injured Workers with Independent Records

Faster case prep, deeper insights for more case value, complete transparency

## Overview

California workers' compensation records retrieval and analysis have changed — but most legal support vendors haven't. Leapfrog your competitors while you win cases and get your clients the best possible outcome with Gemini Legal.

**"They are amazing."**

—Anonymous, Client Satisfaction Survey, 2025

Choosing Gemini Legal means no more waiting for outside sources. It means service of process across the state and transparent, 24/7 records status. It means access to leading-edge software, Gemini Legal Chart/Insight™, that puts faster, more thorough research capabilities at your fingertips.

The result? Quicker, more targeted case prep, better outcomes, and the ability to process more cases and serve more injured workers — all without adding headcount or workload for existing in-house staff.

## Traditional Records Retrieval/Analysis vs. Partnering with Gemini Legal

Relying on Outside Sources	Ordering with Gemini Legal with Chart/Insight
Delays access to facts for case strategy development	vs. Faster access to facts for case strategy development and transparency on status
Records may be incomplete	vs. Removes doubt about record completeness with on-demand access 24/7 and dedicated representatives for questions
Your team must review huge volume of records manually for basic case information	vs. Relevant data is quickly summarized, with citation links to source documents for further research
Records may focus on areas with less value to your case	vs. Ability to quickly find areas with higher value to your case or determine need for follow up
Your team must manually cross-reference medical records data with other documents	vs. Additional documents (even the AMA Guide) can be uploaded and cross-referenced as needed within minutes
Your team must manually extract relevant data for downstream documents or CMS	vs. Surfaces relevant materials in easy-to-view format for faster preparation of downstream documents
Your team's research time is limited due to tasks noted above	vs. In-house research is possible earlier in the process (see above), including cross-referencing other documents and medical records themselves in greater details, thanks to available AI-based queries
